## Product highlights

### Ambilight Spectra 2

The sensorial halo of Ambilight Spectra 2 adds a new dimension to the viewing experience. You feel fully immersed in the images, viewing becomes a more intensive experience than you could ever imagine. The compact Power LED technology integrates seamlessly in the back cover avoiding any glare to the front. The separate drive of the LED's creates a multitude of light segments that fuse into one soft surround of light. This offers improved display of onscreen content and a dramatic expansion of the picture's presence throughout the room.

### Perfect Pixel HD

Perfect Pixel HD Engine offers the unique combination of ultimate sharpness, natural detail, vivid colours and smooth natural motion on all qualities of HD, standard TV signals and multimedia content, for high-definition displays. Each pixel of the incoming picture is enhanced to better match the surrounding pixels, resulting in a more natural picture. Artefacts and noise in all sources from multimedia to standard TV and also in highly compressed HD content are detected and reduced, ensuring that the picture is clean and razor sharp.

### Full HD LCD display 1920 x 1080p

Enjoy the exceptional picture quality of Full High Definition TV signals of HD sources like HDTV broadcast, or Blu-ray DVD. HD ready 1080p is a protected label that offers picture quality far beyond that of ordinary HD Ready. It conforms to strict standards laid out by EICTA to offer a Full HD screen that displays the benefits of resolution and picture quality of a Full HD 1920x1080p High Definition TV signal. It has a universal connection for both analogue YPbPr and uncompressed Digital connection of DVI or HDMI, supporting HDCP. It can display 1080p progressive signals at 24, 50 and 60Hz.

### Perfect Natural Motion

Philips invented Perfect Natural Motion to eliminate juddering effects that are visible with movie-based picture content. Perfect Natural Motion estimates motion in the picture and corrects juddering movements in both broadcast and recorded movie material (such as DVD and Blu-ray Disc). Perfect Natural Motion results in even smoother and quieter pictures with excellent sharpness. Perfect Natural Motion removes judder from SD and HD pictures, including 1080p movies and 24p True Cinema, for a motion performance that surpasses the cinema!

### 100Hz Clear LCD (2ms)

100Hz Clear LCD creates extreme motion sharpness for clear and vibrant images even with fast on-screen motion. The Double Frame Rate Insertion works with a high 100Hz refresh rate. It increases the sharpness of motion reproduction to more than twice that of conventional LCD, resulting in performance with a response time of 2 milliseconds (measured in Perceived Blur-Edge-Width; BEW). This unique Philips technology brings

motion sharpness of LCD displays to an unprecedented level.

### 2250 trillion colour processing

Vibrant and natural images from most advanced colour processing. The 17 bit colour booster optimises each of the 3 colour channels (RGB), a total processing power of 2250 trillion colours. It produces more vibrant colours while retaining excellent sharpness. The advanced algorithms detect skin tones and subtle colour shades, and processes these to give most natural colours.

### Dynamic contrast ratio 30000:1

You want the LCD flat display with the highest contrast and most vibrant images. Philips advanced video processing combined with unique extreme dimming and backlight-boosting technology results in vibrant images. Dynamic Contrast will increase the contrast with excellent black level and accurate rendition of dark shades and colours. It gives a bright, lifelike picture with high contrast and vibrant colours.

### 4 HDMI inputs (3+1) + HDMI CEC

EasyLink uses the HDMI CEC industry standard protocol to share functionality between connected devices and the TV. With Easylink only one remote control is needed to operate main functionalities on your TV and connected devices. HDMI makes an uncompressed digital RGB connection from the source to the screen for the ultimate picture quality. HDMI uses HDCP copy protection. With 3 HDMI inputs on the back and 1 HDMI on the side of the TV you can connect multiple HD sources, for instance an HD set-top box, a Blu-ray player, and Game Console or Digital Camcorder.
