Jamo A 102 HCS6

We are all familiar with the phrase "seen but not heard." With the redefined Jamo A 102 system, Jamo gives you the opportunity to experience the exact opposite.

These satellite speakers might be small in size, but the sound quality they kick out is absolutely huge in scale and pure in quality. Both woofer and tweeter are integrated into a single drive unit, a technique that makes it possible to have a genuine 2-way speaker system in an extremely small cabinet.

Complemented with the newly developed Jamo SUB 210, the Jamo A 102 HCS 6 system offers a clarity, focus and impact that is unprecedented for the size of the complete system. The SUB 210 subwoofer has a very small footprint that allows for unobtrusive placement, but still packs an awesome punch without sounding booming or "out of control."

The Jamo A 102 HCS 6 conforms to the latest equipment with respect to environmental issues, such as energy-saving.

Specifications	A 102	A 10 CEN	A 10 SUR
System	2-way	2-way	Full Range

Jamo SUB 210

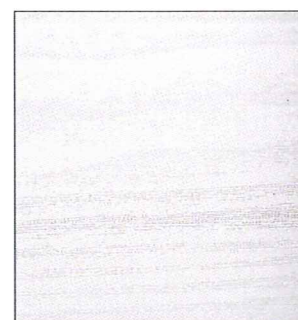

With a new design, the Jamo SUB 210 subwoofer is more compact than any of the predecessors in its class, offering easier placement in today's living environment.

Furthermore, the Jamo SUB 210 comes in a wide variety of finishes, including high gloss black or white, which is an easy match with modern furniture.

This Jamo SUB 210 subwoofer has a 200W amplifier and long-throw 8" woofer in a bass-reflex-enclosure, which gives it a level of performance unequalled in its class.

The auto-on-off and controls for level, cut-off-frequency as well as phase, together with line-level-input make it very easy to integrate this subwoofer with any other TV/speaker/amplifier/receiver combination.
